

# INTRODUCING LESTARI CAPITAL

Lestari Capital develops innovative business models that conserve natural ecosystems, restore landscapes, support communities and tackle climate change.

LESTARI  
CAPITAL

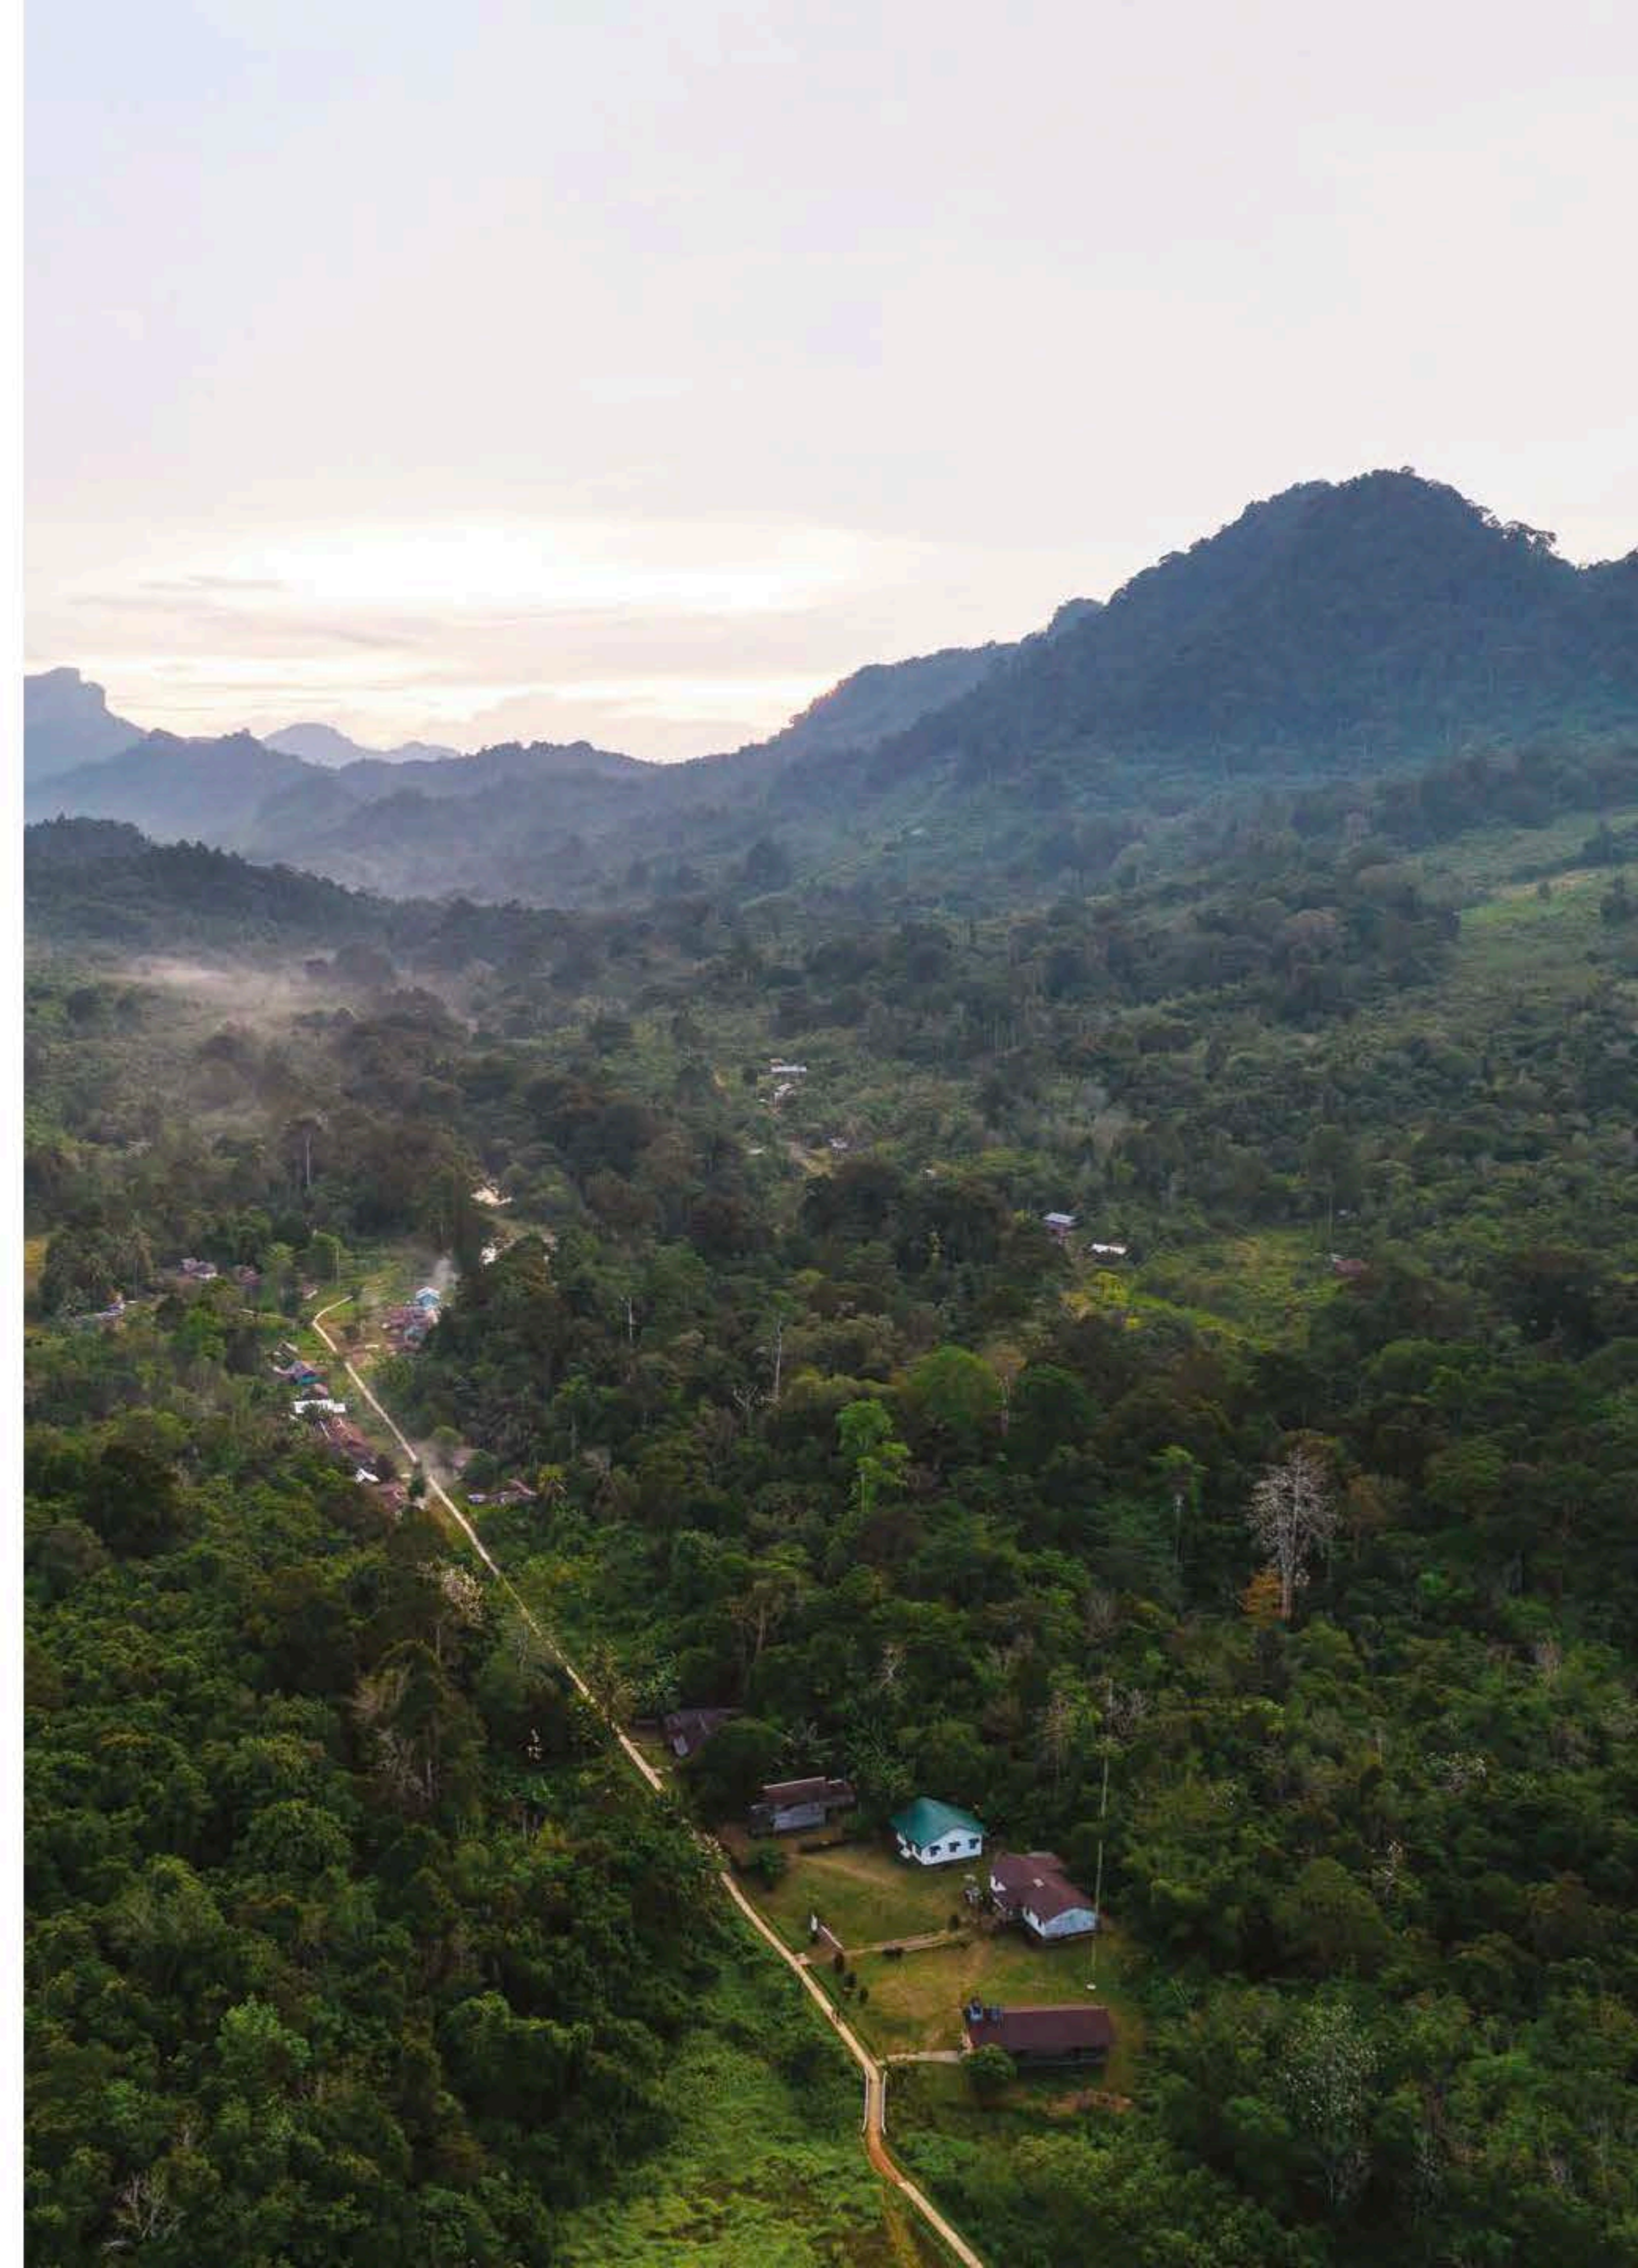

# THE TIME FOR NATURE-BASED SOLUTIONS IS NOW

Supporting communities, protecting biodiversity and limiting the global temperature rise to 1.5°C means not only stopping further deforestation, it means conserving and restoring natural landscapes. It means supporting our ecosystems over the long term and at scale.

Leading global corporations recognise the need for change. And private-sector demand to support nature conservation and restoration has increased ten-fold since 2017. But existing models often cannot deliver real, positive, sustainable ecosystem impacts at scale.

- Buyers need more high-quality, professionally managed, verifiable offsets and insets including climate, biodiversity and social credits
- Supply of these ecosystem impacts is fragmented and of uneven quality
- Lacking management, outcomes are unpredictable and unreliable, exposing buyers to reputational risks
- Investors lack clarity in this new asset class due to inexperienced supply-side parties

Lestari Capital addresses these needs with innovative, scalable, private-sector-led business models that deliver the nature-based solutions corporations need.

# NATURE-BASED SOLUTIONS IN ACTION

Lestari Capital is already delivering for corporations and positively impacting nature, communities and the climate.

## SOLUTIONS

Solutions provides professional sourcing, screening and management of conservation and restoration ecosystem services so that businesses can attain the highest quality verification for their products.

- USD 21 million of remediation finance dedicated for conservation through four confirmed corporate partnerships
- 12,500 hectares preserved and restored over 25 years through four approved conservation projects

## COLLECTIVES

Collectives facilitate long-term collaborations around an innovative business model that directly embeds forest conservation finance in supply chains. The first of these is the Rimba Collective, servicing the palm oil sector, which launched in 2022.

- Rimba Collective aims to mobilize USD 1 billion to help protect and restore 500,000 hectares of forest and improve the livelihoods of 32,000 individuals in forest frontier communities over 30 years
- 75,000 hectares preserved and restored by the end of 2022
- Plans underway for the model to be scaled and expanded to other commodities and geographies

## CLIMATE

Climate identifies conservation projects, sources market-ready Verified Carbon Units (VCUs), and professionally manages carbon investment portfolios for financial institutions, private equity investors and energy traders.

- Launched in 2021 and already mobilized more than USD 500,000 profit
- Building nature-based solutions projects into multiple investment portfolios
- Sourcing projects early in the dynamic voluntary carbon market to secure investor-buyers' pipeline requirements

SPOTLIGHT ON THE RIMBA COLLECTIVE

# A GLOBAL RESPONSE TO A GLOBAL CHALLENGE

Our partners are leading global actors in the agricultural commodities industry, and our finance model can be scaled and replicated all over the world.

Our first projects are in Indonesia and Malaysia. Together, these two countries produce 85% of the world's palm oil and host some of the most biodiverse, critically threatened ecosystems on the planet. We plan to expand across Southeast Asia, Papua New Guinea and beyond.

SPOTLIGHT ON THE RIMBA COLLECTIVE

# THE RIMBA COLLECTIVE UNIQUE FINANCE PLATFORM

The Rimba Collective is built around a unique, innovative and scalable financial platform that embeds forest conservation finance in the day-to-day business of procuring raw materials.

Through performance-based payments, the Rimba Collective delivers certified, scalable ecosystem impacts for businesses across the palm oil sector.

The finance platform is managed professionally and transparently by Lestari Capital, which oversees the performance, verification and delivery of all its project outcomes.

# TOGETHER, WE'RE ACHIEVING REAL, POSITIVE, SUSTAINABLE IMPACTS ON NATURE, PEOPLE AND THE CLIMATE.
